SL.No	Name	Excellent	Very Good	Good	Average	Poor
1	Content	3	10	6	1	
2	Presentation	6	7	5		1
3	Demonstration	6	12	2		
4	Practice time	4	13	3	1	
	Total	19	42	16	2	

Comments:

Session - 01

- Exercise on [pneumothorax](#) - An ICD Demo if included would be very nice.
- Exercise on Intubation – Securing of ET Tubes if included would complete the exercise, Tracheostomy.
- On the whole a very helpful demonstration should be included as a routine course at the beginning of internship, which intern would help interns practice & give them enough confidence to avoid experiments on patients.
- Modes of ventilator can be demonstrated.
- Intubation could be demonstration better.
- CPR was excellent.
- Include ventilation procedure, ICD Procedure.
- Thanks for the course offered.
- CPR training was very good.

- Overall a very good.
- At the start of internship will be very helpful.
- Use cheap sutures materials.
- Should be candidates before start of internship.
- It very good practice learning session.
- I am satisfied three two sessions.
- CPR session was very helpful.
- Will be more helpful if skill classes one kept at the starting of internship.
- If you start to demonstrate some more practice skills along with that it will add up the practical skills for the beginning.
- If your demonstrate the use of ventilator. But whatever done is very good & learned a lot in short line.
- ABG procedure and interpretation in emergency set up.
- Overall it is very good.

Session – 02

- Excellent Demonstration.
- Was excellent.
- Second session was much more better.
- Suturing was the best part.
- Use non expensive suture materials.
- CPR is I thing which every should know & was taught excellently here.
- It is more of suturing and dressing.
